# Swing Trade The T-Line

A Simple Strategy That Works

[Rick@RickSaddler.com](mailto:Rick@RickSaddler.com)

# Indicators Needed

- Candlesticks
- T-Line (8 exponential moving average)
- 34 Exponential
- 50 Simple
- Chart Volatility

Too many indicators can cause you to  
second-guess your judgment

# Consistency-Key to Success

## Something to Think About

It's not the numerical value of the moving average, indicator or time frame that is "magic," it's the consistency of your use of your indicators or time frames of your choice for entry and exits.

# T-Line Swing Trade-Buy Box

# The Buy Box

# Remember The Trend Is Your Friend

## Something to Think About

You don't have a downtrend until you have a downtrend and you don't have an uptrend until you have an uptrend

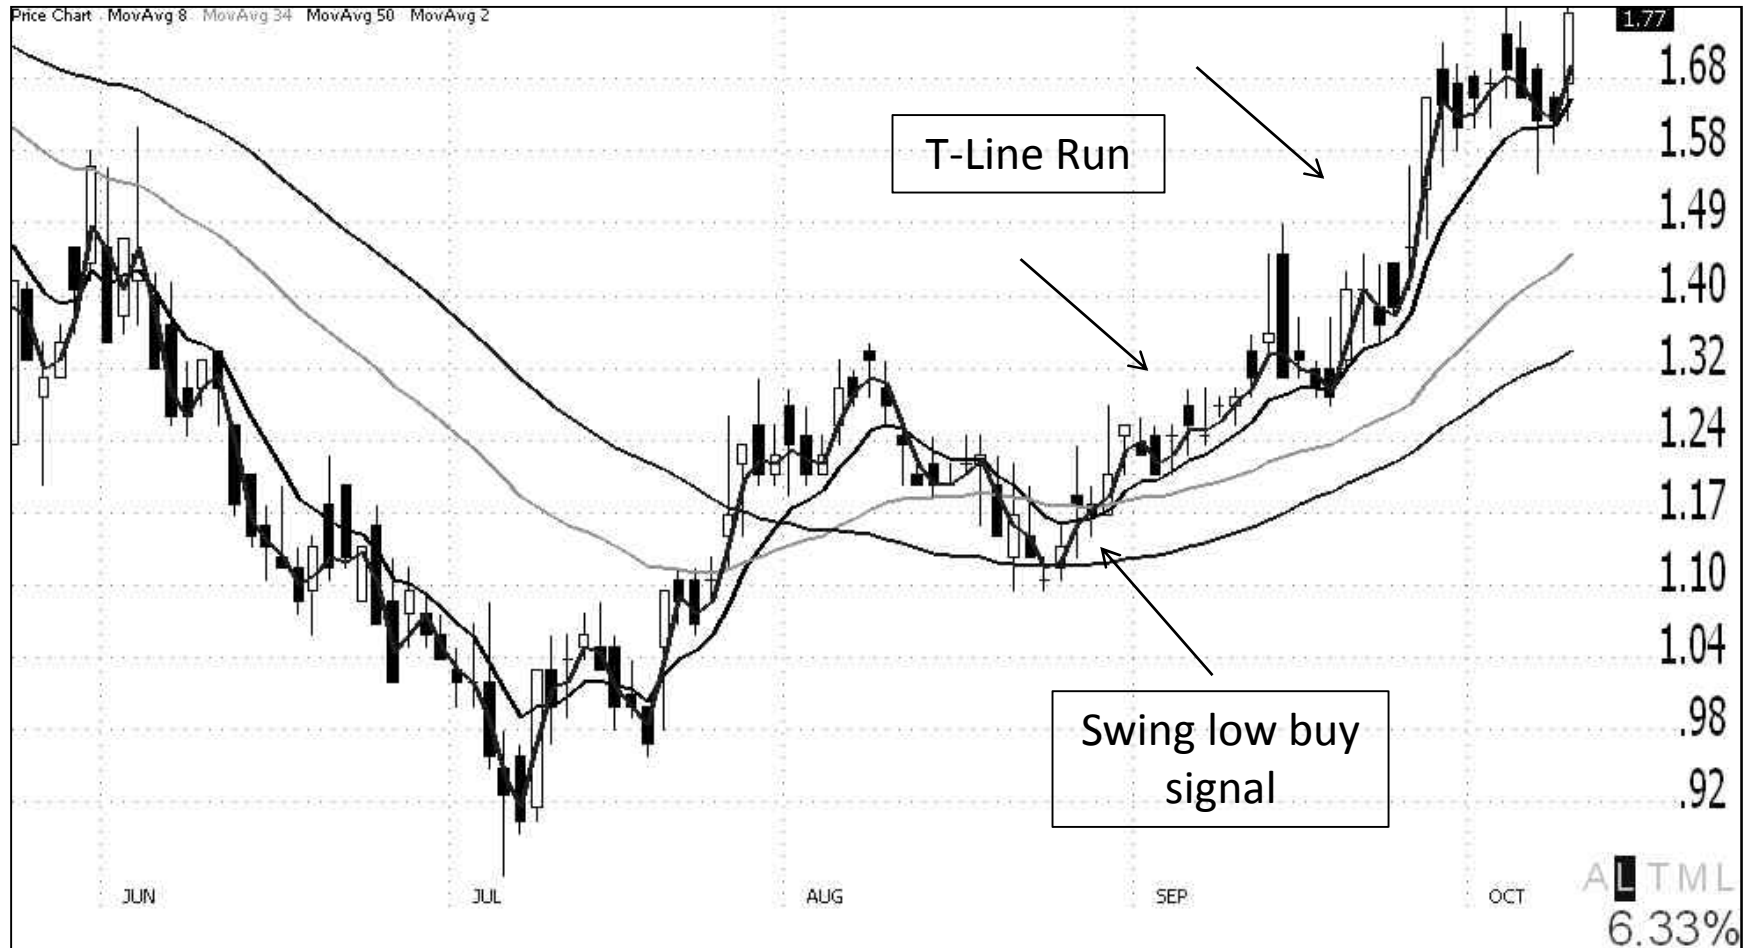

# T-Line Run

# T-Line Run

- When price breaks out over the T-Line and continues to run

# T-Line Run Example

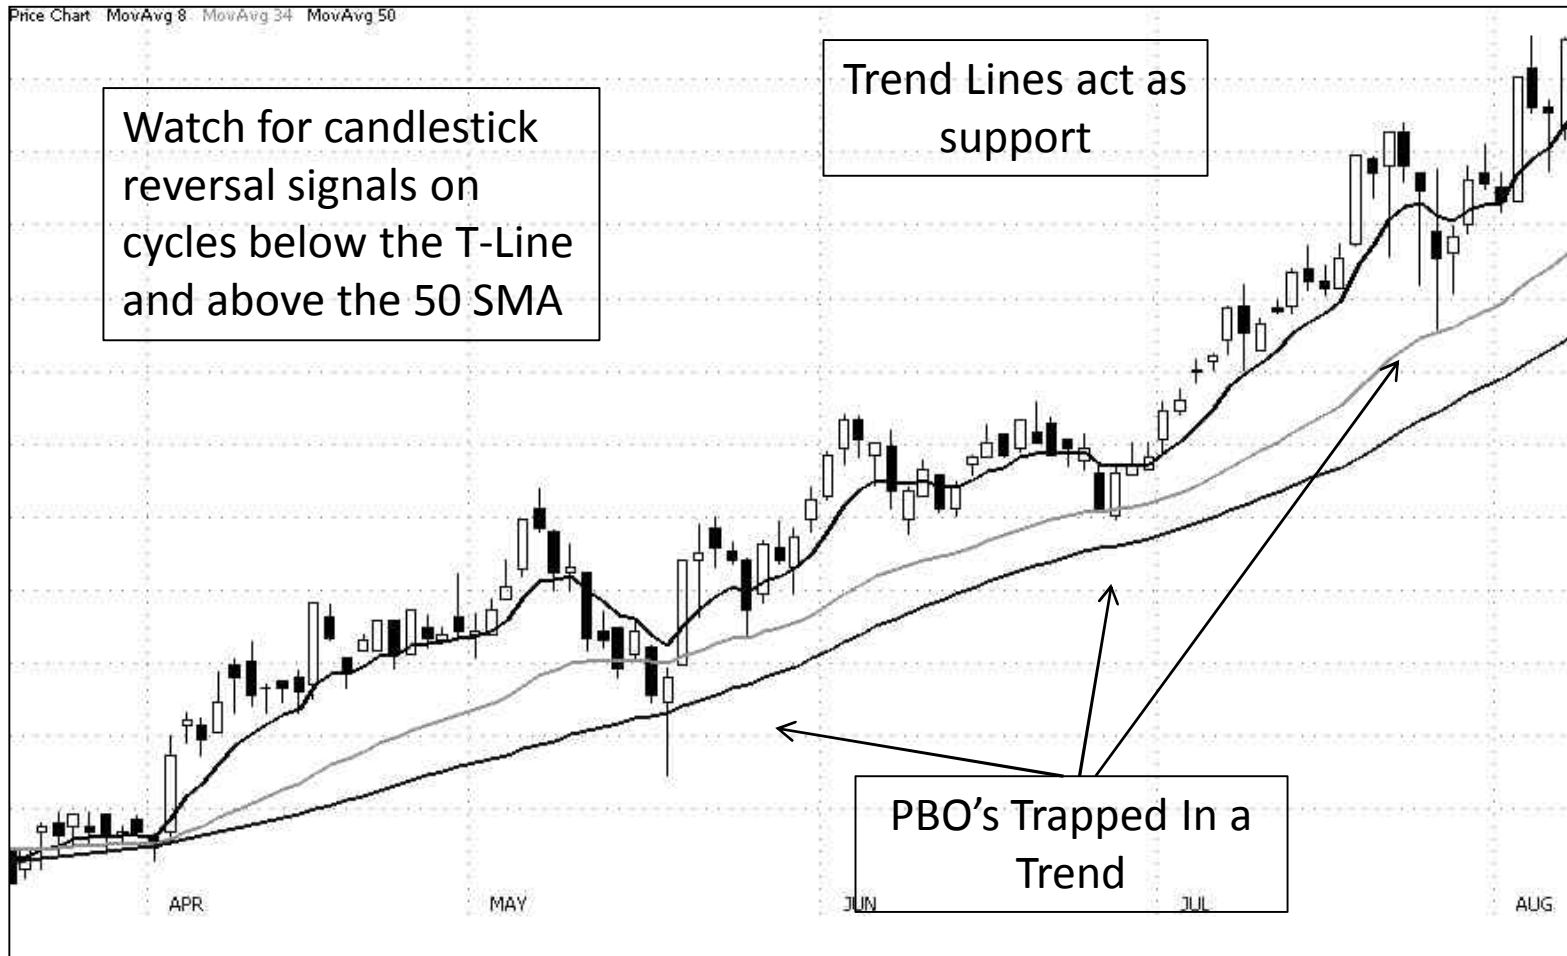

# Buying the Dips on Moving Trend Lines

# Price Cycles Around the T-Line

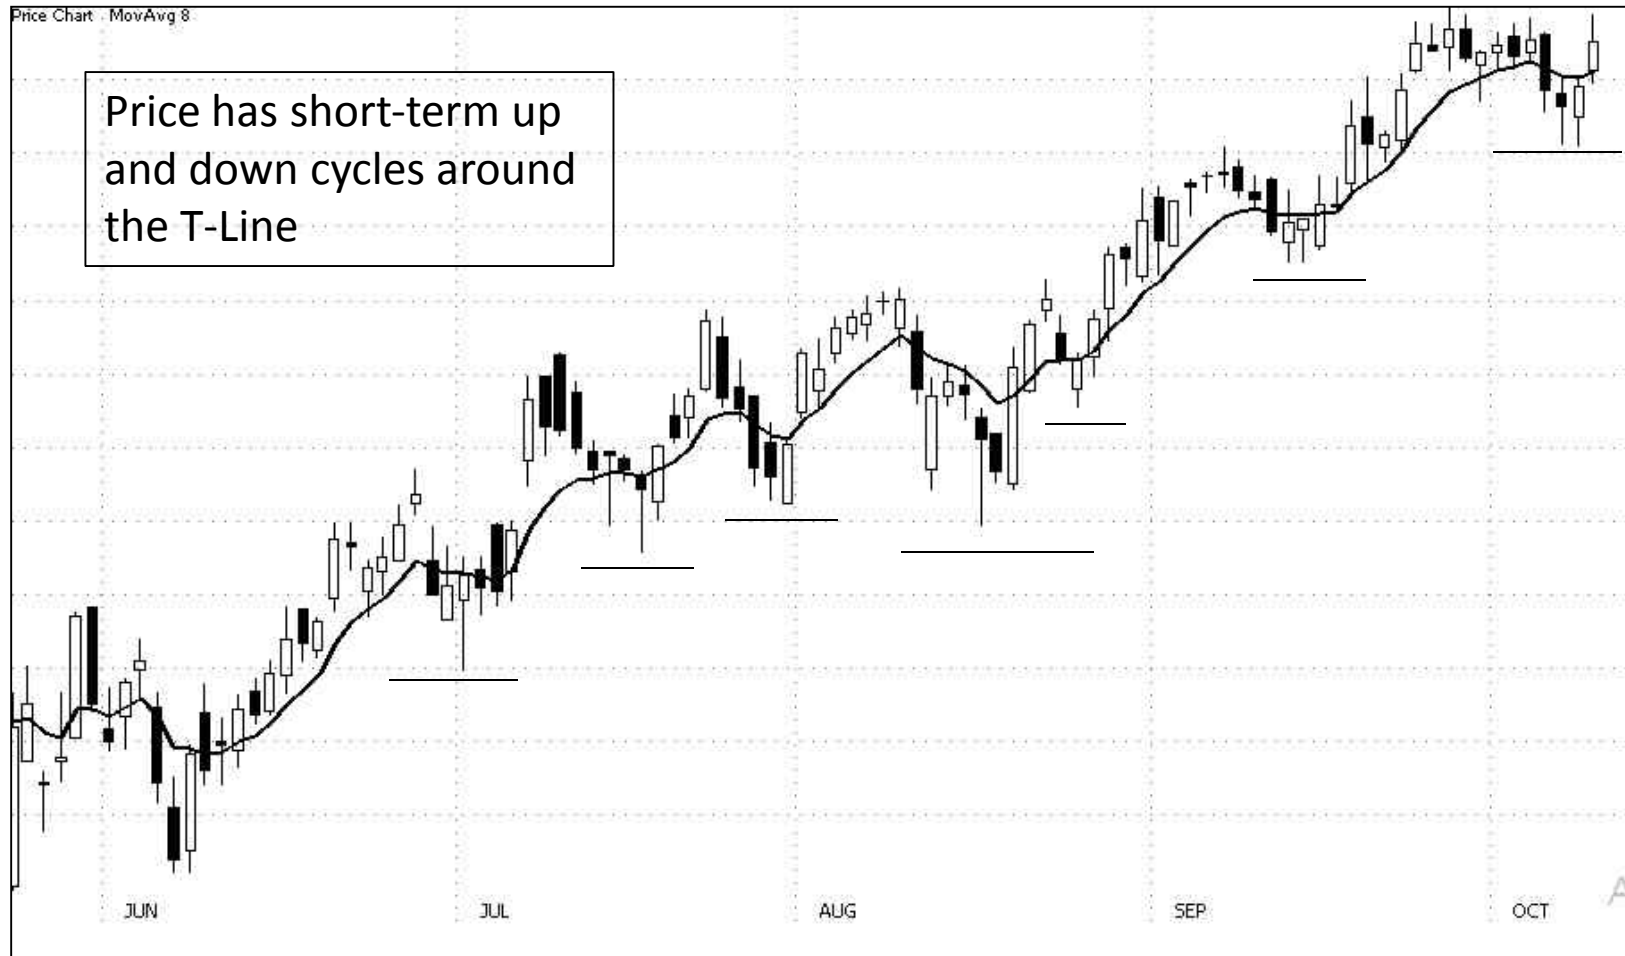

# Dips with MA Trend Lines

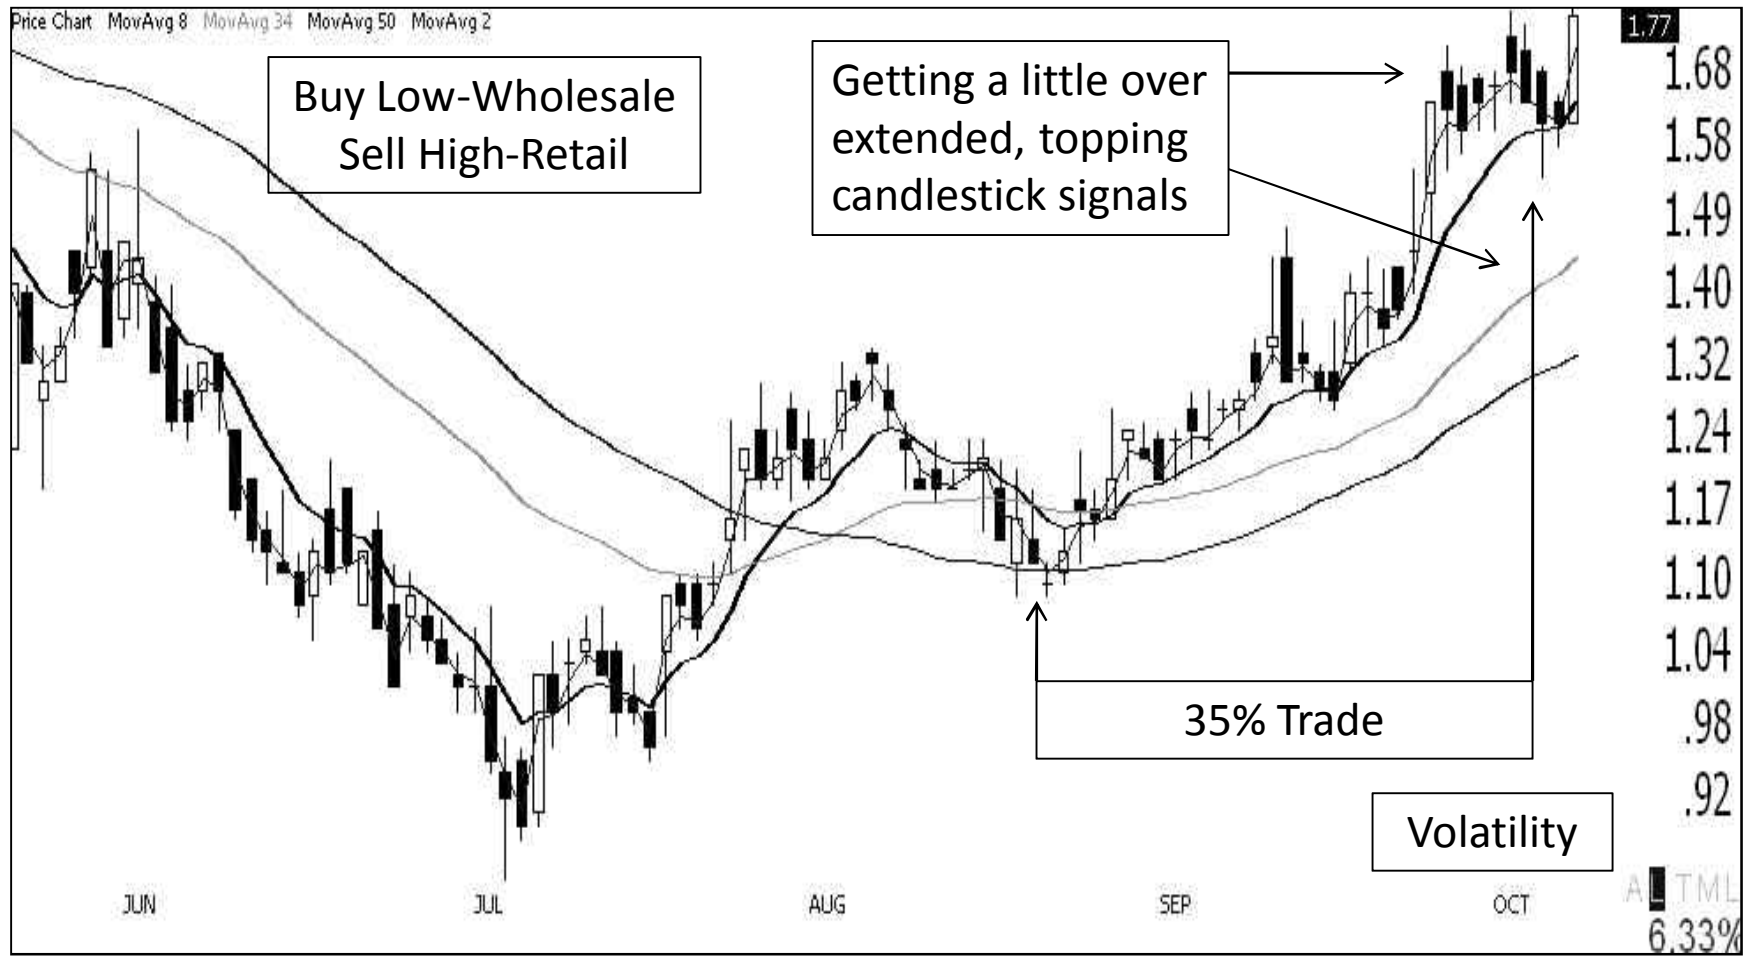

# Buy the Dips
